

The [Faculty of Education](#) (UM) is working in collaboration with the Centre for Educational Neuroscience at University College London/Birbeck and the [Educational Neuroscience Hub Europe](#) (Malta) to present another series of seminars for educators (including teachers, LSEs, support services staff and educational leaders) and parents. The *Connect to Learning Series 3*, consisting of **7 webinars**, will focus on presenting pertinent areas in the science of teaching and learning, and will target what educational neuroscience is all about, memory, emotion regulation, and facts and neuromyths about neurodivergent needs. Through this series, support will be provided to educators to equip them with ideas and skills that may enhance their current practices, while also building a community for professional collaboration and support.

Those educators who choose to register for the sessions and participate actively in at least 5 webinars will receive a Certificate of Participation issued by the Faculty of Education at the end of this series. All seminars will be delivered online and are free of charge. The third series of seminars will be launched on October 18th and you can register for the first webinar using the link below.

EDUCATIONAL NEUROSCIENCE - Webinar 1

Date: Tuesday, 18th October 2022

Time: 5pm to 6pm

Registration is free using the link below:

https://universityofmalta.zoom.us/webinar/register/WN_xuDa4nkHRCCclZG9QNCytA?fbclid=IwAR0paS2FVIn0pDUXD8HLLuAC3Bske6S_Ep9Nh8Qus3N6rvxRRNwz9GTrHus

If you are unable to attend and would like to receive the recording of the webinars, you would still need to register using the registration links above.
